EDUCATION

University
2021 - 2027
National Institute of Applied
Science and Technology (INSAT)

SKILLS

- **Languages :** PHP, JavaScript, Python
- **Frameworks & Libraries :** Symfony, NestJs, Angular
- **Databases :** MySQL, MongoDB, Redis
- **ML :** scikit-learn, Tensorflow, Pytorch
- **Tools & Devops :** Git, Github

LANGUAGES

- English
- French
- Arabic

PROFILE

Software Engineering student passionate about web development and Machine Learning (NLP & Reinforcement Learning). Skilled in full-stack development (Symfony, Angular, NestJS) and deploying production applications. Seeking a summer internship to apply my problem-solving skills in ML or software engineering.

PROJECTS

HootVaping – E-commerce Website
(Symfony, PHP, JavaScript, Bootstrap, MySQL)

- Independently built and deployed a live e-commerce website for e-liquid products.
- Implemented secure user authentication, product management, and order workflows.
- Used Symfony & MySQL to handle database transactions securely.
- live at : *hootvaping.tn*
